MEMORANDUM FOR: James P. Lynch
Director of Geographic and Cartographic Research

FROM : Clifford D. May, Jr.
Director of Data Processing

SUBJECT : Public Release of Information in Machine
Readable Form

REFERENCE : OGC Memo to D/ODP, dtd 23 Feb 78, same subj.

1. In response to the referenced memorandum, I am providing a cost estimate for supplying individual World Data Bank II data files on magnetic tape. These data files include the following:

- railroad file for either North American, South American, Europe, Africa, or Asia.
- internal boundary file for South America, Europe, Africa, or Asia.
- road file for Asia.

2. The cost estimate includes providing any one of the above data files on a magnetic tape. The data format on the magnetic tape will be an exact duplicate of our own files. Documentation includes the physical recording characteristics of the data on the magnetic tape, description of the data format and a listing of a FORTRAN program to read the tape. The cost estimate is as follows:

- Magnetic Tape	\$ 10
- Manpower (12 hrs x \$17)	204
- Machine Time	50
- Documentation	10
TOTAL	\$274

3. ODP's policy (attached) on the release of data on magnetic media states that the customer, in this case OOCR, is responsible for reviewing a print out of the magnetic tape and certifying that the data and tape are unclassified before it can be released outside the Agency. I assume that adherence to this policy will cause you no difficulty.
